

# Zorya

Web Platform for data lakes and exploration of  
artificial intelligence for Digital Pathology

**M3: Presentation of initial operational capability**

Projeto em Informática 24/25

**Group 7:**

Carolina Prata - 114246

Diogo Fernandes - 114137

Henrique Oliveira - 113585

João Varela - 113780

Raquel Vinagre - 113736

**Supervisors:**

Luís Bastião Silva

Carlos Costa

# TABLE OF CONTENTS

## 01 Context and Goals

Contextualization of the concept and main goals

## 02 Calendar

Calendar changes and backlog

## 03 System Architecture

Detailed structure of the system

## 04 What are we doing?

Current frontend and backend state

## 05 Database Changes

Changes for improved interaction with external tool

## 06 Live Demo

Application demonstration

## 07 Next Steps

Planned steps for the next milestone

# CONTEXT

**Digital Pathology Platform for Doctors/Researchers**

**Upload and Visualization of DICOM Images**

**Extraction of Metadata**

**Automatic Work Distribution**

**Automated AI-assisted Annotations**

# CALENDAR

Construction	Database Construction		- Models Implementation		11/03/2025	19/03/2025	Henrique	● Done
Construction	Website Skeleton Development		- Create base projects - Define website structure	Frontend Database Backend	11/03/2025	15/03/2025	Diogo	● Done
Construction	API Development		- Setup - Endpoints - Testing - Documentation (already built in FastAPI)	Backend Frontend Testing	14/03/2025	30/03/2025	João Diogo	● In progress
Construction	Frontend Development		- Setup - Develop UI - Integrate with API	Frontend	16/03/2025	30/03/2025	Raquel Carolina	● In progress
Construction	✓ CheckPoint				25/03/2025	25/03/2025	Everyone	● Done
Construction	🕒 Milestone 3	Presentation of initial operational capability		Presentation	08/04/2025	08/04/2025	Everyone	● In progress

PathoWorkflow #31

[USER STORY] Filter Studies by Gender

user story

Milestone 3

PathoWorkflow #18

[FEATURE] - Develop Series Listing Page for Selected Study

frontend

Milestone 3

PathoWorkflow #17

[FEATURE] - Implement Datasets Overview Page UI

frontend

Milestone 3

PathoWorkflow #14

[TASK] - Database Construction

database

Milestone 3

PathoWorkflow #20

[API] - CRUD for Studies

backend

Milestone 3

PathoWorkflow #25

PathoWorkflow #15

[TASK] - API Development

backend

Milestone 3

PathoWorkflow #16

[TASK] - Frontend Development

frontend

Milestone 3

PathoWorkflow #19

[FEATURE] - Viewer for Image Exploration and Metadata Display

frontend

Milestone 3

PathoWorkflow #7

[FIX] - Fixing broken compose.yml

backend

Milestone 3

PathoWorkflow #27

[FEATURE] - Implement Algorithms Management Page

frontend

Milestone 3

PathoWorkflow #32

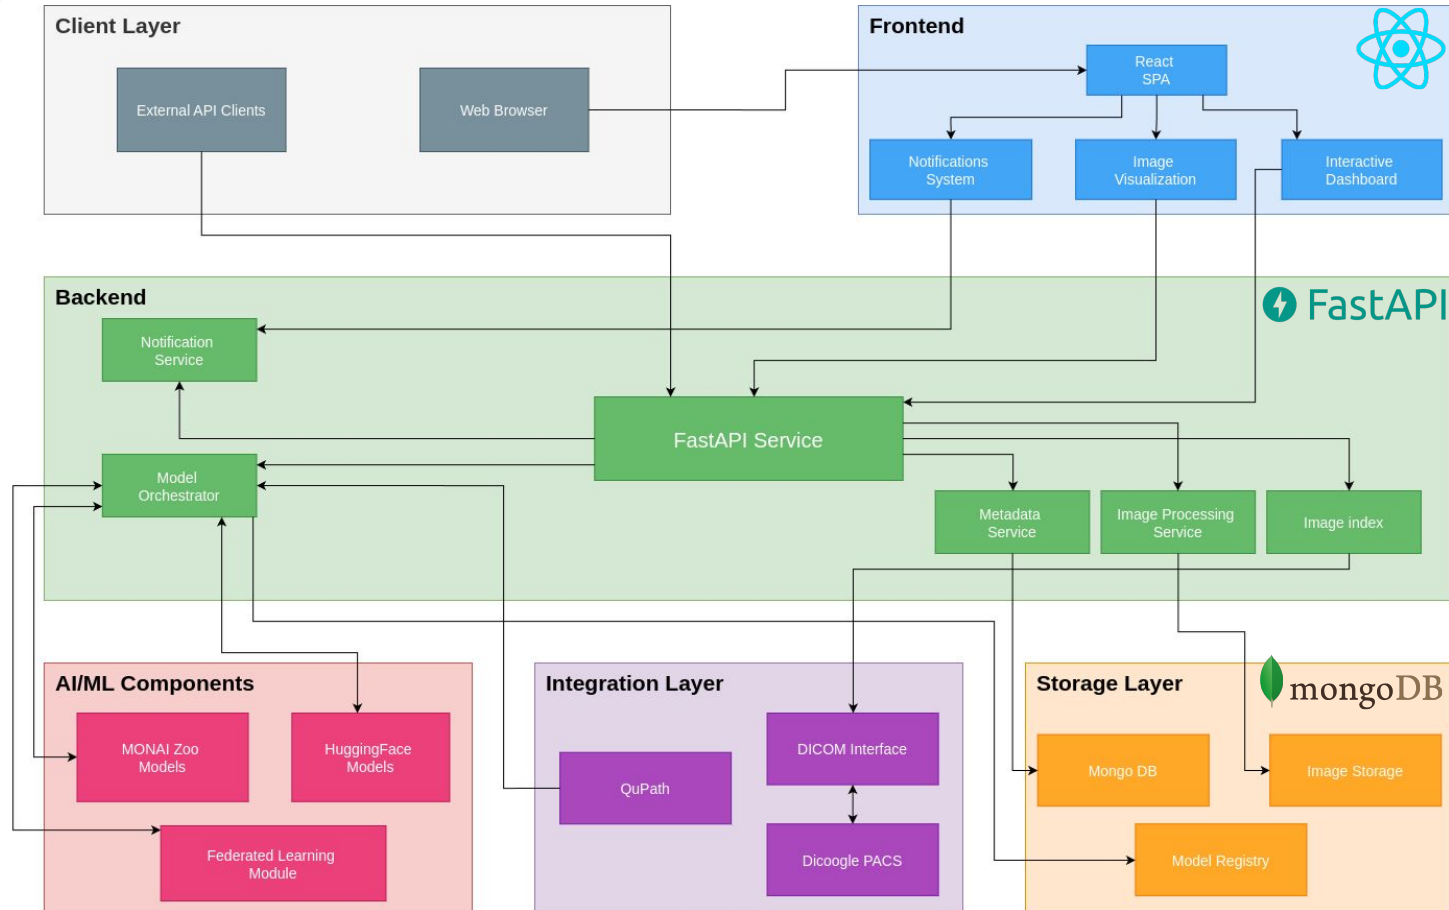

[FRONTEND] - Implement Actions page

frontend

Milestone 3

6

# SYSTEM ARCHITECTURE

# WHAT ARE WE DOING?

## Frontend:

Implementing viewer

Implementing Algorithms page

Defining and starting to implement Actions page

Studies page improvements

## Backend:

Implementation of Dicooogle API

# DATABASE CHANGES

DATASETS -> STUDIES -> IMAGES

STUDIES -> SERIES -> IMAGES

# DEMO

Open

# NEXT STEPS

**Resolve viewer implementation issues**

**Implement Actions page**

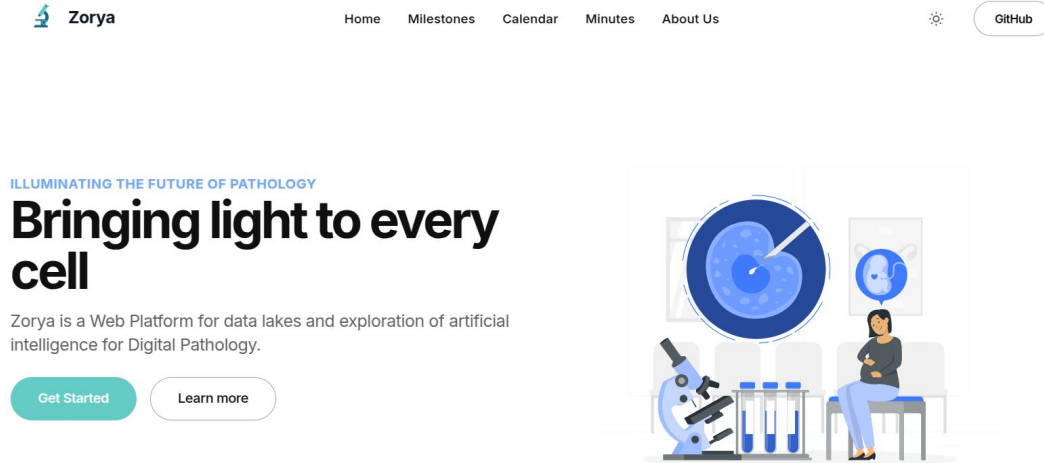

**Finalize Algorithms page**

**Integration of QuPath and GrandQC**

**Implementation of a Dicoogle Plugin to:**

- Automate Indexing
- Extract metadata
- Use models.
